Keyword : Router, Linux

Abstract:

Basically creativity into something very important, when the technology changes so quickly. 486-DX computer for example, who used to be proud of now no more than an old machine that is more worthy of display company warehouses. Linux comes with a very creative solution. 468-DX computer use conjured up a router is a reliable PC. DHCP server, firewall, FTP servers, Telnet servers and other capabilities can be done with Freesco without time-consuming and high cost. And that is not unlawful passi.
